Kindly indicate the number of days for which the accommodation is needed.
Dear Friends and Colleagues:

We are glad to inform you that the 15th continuing surgical education programme will be held on 29, 30th June and 1st July 2017 at St. John's Medical College Hospital. Our endeavour is to provide students of surgery with a mix of theory, clinics and a "hands on experience". The lectures, videos and case discussions will greatly help PGs, preparing for the MS/DNB exam.

The hands on workshop will stress on developing basic surgical skills such as bowel anastomosis, use of staplers, vascular anastomosis and basic laporoscopy.

The oration is in memory of Professor Alfred Mascarenhas, who was Head of the department of surgery for 26 years and Dean of SJMC. He was also an excellent teacher and an internationally renowned surgeon.

The response to our CSEP in the past has been overwhelming and well appreciated. With the support and encouragement of all who have attended the previous programmes, we have set out to hold the 15th CSEP in June this year. We have applied for credit points with Karnataka Medical Council. Faculty for this programme have been specially selected.

We look forward to being your hosts from 29-06-17 to 01-07-17 this year and provide you an experience of cordiality, informality and high educational standards that St. John's is known for.
