

## Paediatric Endocrinology Services

**Venue: Room No 22 – Wednesday 2PM**

**Faculty in Charge – Dr Poornima RN, Asst. Professor**

Paediatric Endocrinology clinic is one among the speciality clinical services in the dept of Paediatrics at St John's National Academy of Health Sciences.

Dr Poornima R N has special interest in Paediatric Endocrinology and has done fellowship in Paediatric and Adolescent Paediatric endocrinology under RGUHS University in 2015 and the inception of the clinic was from November 2016.

Services offered are dealing with the hormone related issues in children. Includes short stature, obesity, Diabetes, Precocious and delayed puberty, Pituitary related problems, Thyroid and Parathyroid and ambiguous genitalia etc. We provide comprehensive care pertinent to hormone related issues in coordination with allied specialities .We have a good backup of lab facilities for hormone stimulation tests, Expertise in Radiology for evaluation of genital structures for younger age group; Paediatric surgery for genital reconstruction for ambiguous genitalia ; geneticist for the diagnosis of genetic conditions and psychologist support for chronic conditions.

We have a support group for diabetes families and diabetes day celebrations done every year in the month of November to get the diabetes families together.
