floor, St. John's Medical College

APPLYING FOR 2 KMC CREDIT HOURS.

**OPEN FOR ALL MEDICAL
RESEARCHER'S**

Greetings! We, at the Department of
Physiology, St. John's Medical College,
welcome you...

A visual abstract is a simplified,
graphical summary of a research study,
article, or concept. It uses images,
icons, diagrams, and minimal words to
convey the main idea, methods, and
key findings at a glance, instead of long
text. It is often used in academic
publication, conferences, and
workshops to make complex
information easy to understand and
share quickly. While improving visibility
of studies on social media,
presentations, and journals, it helps
both experts and non-specialists grasp
the study quickly.

Expected Outcomes of the workshop:

Participants will -

- Understand the purpose of visual abstracts.
- Learn tools & design principles (hands on).
- Have a draft visual abstract of their own.
